## **STOCKED UP ON LENNOX COMMERCIAL HVAC EQUIPMENT**

**Heatcraft Australia is well stocked on its comprehensive Lennox Commercial HVAC Equipment range to offer a speedy upgrade or replacement project solution.**

The range consists of Lennox US manufactured Rooftop Packaged Units, Lennox European manufactured Rooftop Packaged Units, as well as NEW Lennox European manufactured Water-Cooled Reverse-Cycle Packaged Units and Lennox European manufactured Air-Cooled Reverse-Cycle Scroll Chillers.

Two important features remain constant across the range – reliability and efficiency. “We source only premium, high-efficiency product from our global Lennox portfolio”, commented Heatcraft Segment Manager, Thanh Ngo.

“The range is well supported from pre-sales to sales fulfilment through to commissioning, with a wide range of parts available 24/7 through the Heatcraft wholesale network’s national footprint and its ‘24/7 Access to Parts’ program.”

The Neosys and Ecolean Air-Cooled Scroll Chillers are well established in the Australian market finding favour across food/industrial process applications and comfort cooling projects alike. The new Lennox Aqualean Water-Cooled Reverse-Cycle Packaged Units are gaining solid traction by virtue of its 7% higher energy efficiency and 35% reduced height profile when compared on average with the market leading comparative model.

When it comes to specification of the Lennox Packaged Rooftop range, Heatcraft have simplified the process with the Heatcraft smart@ccess HVAC Product Selector online program. Account customers can easily enter their required capacity and then view the possible units that meet their project needs. Alternatively, customers can enter an alternate brand unit and the smart@ccess program will return comparable Lennox equivalent models.

“smart@ccess is one easy way to filter through all the options. Or customers can speak directly with their local Heatcraft Field Engineer or Account Manager to find the most optimum Lennox solution for their project. All units are project priced, with special pricing able to be negotiated on a job-by-job basis.”

Contact Heatcraft for more information, by calling 13 23 50.
