WIRELESS SMART TOOLS NOW AT HEATCRAFT

The new CPS wireless Smart Tool Range is now available from all Heatcraft Australia branches.

The growing range of products currently includes wireless anemometers, environmental meters, static pressure meter/manometer and data loggers which allows a technician to access system information wirelessly to their phone or tablet and in turn export the data in real time and location to their customer or office. It can all be done without leaving the site or needing access to a computer for downloads.

“Technicians today want information fast. For that reason, we were eager to embrace this new Smart Tool range from CPS”, stated Heatcraft Category Manager, Melissa Barlow. “It’s a nice synergy with our existing smart@ccess online portal, where customers can readily access technical information on a wide range of CPS product.”

The new ABM-200 series meter is one tool in the Smart Tools range. CPS calls it the ‘swiss army knife of meters’. It’s an anemometer and an environmental meter combined, being able to measure temperature, temperature differential, dry bulb, wet bulb, heat index, relative humidity, dew point, barometric pressure, air density, indoor vs outdoor conditions, wind speed and direction as well as generating personalised professional reports.

The ABM-200 also has accessories such as the 1.6 meter extension pole that allows the technician to access air vents without having to use a ladder - a very good OH&S feature.

The ABM-200 coupled with the CPS Link complimentary app offers accurate, affordable and easy to use technology designed to save customers time and money.

For further information on the ABM-200 or any product in the Smart Tools range contact your local Heatcraft branch on 13 23 50 or visit www.heatcraft.com.au.
