HOW TO ORDER PROPELLER FAN BLADES

1. When ordering, specify complete part number.

2. Ordering Information

MOTOR ROTATION & RELATIONSHIP TO FAN	CORRECT BLADE & PART NUMBER	MOTOR ROTATION & RELATIONSHIP TO FAN	MOTOR ROTATION & RELATIONSHIP TO FAN	CORRECT BLADE & PART NUMBER	MOTOR ROTATION & RELATIONSHIP TO FAN
 Fig. 1	 P. - ...A.R....	 COUNTER-CLOCKWISE	 Fig. 3	 P. - ...N.R....	 COUNTER-CLOCKWISE
 Fig. 2	 P. - ...A.L....	 CLOCKWISE	 Fig. 4	 P. - ...N.L....	 CLOCKWISE

Typical Part No.:

Special Extras: Monel Rivets, Keyways, extra grub screw, special finishes.

3. Rotation and Boss Position

Both the fan rotation and boss position are determined when facing the blade from its discharge side, irrespective of its relationship to the drive motor. Clockwise is shown as R (Right hand) and Counter-Clockwise as L (Left hand). Boss is either N (Near side) or A (Away side). Table has been provided as an aid in determining the correct rotation and boss position.

Note: Drive motor rotation is determined facing its shaft end.

4. Pitch Angle (Measured over spider)

Where the pitch angle (Ref: FIG. 5) is not available, leave this section of the part number blank and state separately the axial depth (Ref: FIG. 5).

Note: If the axial depth is important, include both dimensions.

5. New Applications

Where exact blade specifications are not known, specify as much of the part number as possible, plus the following data:

- Motor;
 - Type: If shaded pole, capacitor run, split or three phase.
 - Speed in RPM.
 - Power in watts output or horsepower (HP).
- Airflow required in CFM or L/s.
- Static air pressure in inches water gauge or Pascals.
- State whether pitch and/or axial depth important.

FAN BLADES PLASTIC

Part Number	Diameter (mm)	Rotation	Bore Size	List Price
5-S4-4-CCW125F	100	ACW	1/8"	\$37.49

www.austfan.com.au

Australian Fan and Motor Company Pty Ltd (AFMC) is a wholly Australian owned company with over 27 year's of experience and is now Australia's largest manufacturer of direct drive fans for the HVAC industry.

Our product range includes direct drive centrifugal fans, tangential fans, axial fans and 'C' frame electric motors. Fan performance ranges from 20 l/s to 3000 l/s.

We are also agents for Yilida, one of Asia's largest fan manufacturers, with products including double and single inlet forward curve and backward curve fans along with backward curved airfoil fans with performance ranges from 270 l/s to 67,000 l/s.

AFMC. Australia's largest manufacturer of direct drive fans.

We're Bringing Together Global Brands and Leading Technology

Through our global brands and connections, we harness the world's leading brands and technology. Delivering the highest quality products, designed with efficiency in mind, they are easy to install, reduce running costs and provide benefits that you can pass on to your customers.

Being part of the Heatcraft Worldwide Refrigeration Group means we have product development and manufacturing facilities that span the globe. Across North America, Europe, Brazil and China, we are in touch and always stay ahead of the game providing solutions to match your changing needs.
