LENNOX RAMPS UP SPLITS EFFICIENCIES

With new Minimum Efficiency Performance Standards (MEPS) regulations effective October 1, Lennox has reinvigorated its residential HVAC range so that it not only meets, but exceeds the MEPS requirements.

The new MEPS changes detail an average increase in efficiencies for air conditioners of about 10%, but all Lennox inverter models exceed this and achieve average improvements of more than 20% compared to the previous requirements. This is predominantly achieved by incorporating higher energy efficient rotary compressors and DC motors within the units.

HVAC Category Manager at Heatcraft, Darshan Nagarsekar commented; "With the new MEPS requirements being so stringent, we have not only maintained the range of wall hung fixed and inverter splits, we can also assure our customers that Lennox splits are tested on full load capacities and are 100% compliant with Australian Standard AS/NZ 3823".

In addition to the efficiency improvements, the range of wall hung and inverter splits will also have a fresh new look that is clean and streamlined.

The Lennox range includes both fixed speed and DC inverter models ranging from 2 to 7kW and easy to install window units ranging from 2 to over 4kW.

For more information on the Lennox range, contact Heatcraft on 13 23 50, or visit www.lennoxaus.com.au

Heatcraft Worldwide Refrigeration® is a global leader in commercial refrigeration serving over 70 countries worldwide building its vision of being first choice in refrigeration. Setting the global benchmark in customer service, Heatcraft is at the forefront of sustainable technologies providing innovative refrigeration solutions that enhance the way we live.

Part of Heatcraft Worldwide Refrigeration, **Heatcraft** is a leading wholesale distribution business catering for the refrigeration and air conditioning trades with a distribution network of over 70 branch outlets across Australia and New Zealand.

The Heatcraft vision is to be the market leader in temperature and climate control solutions.
