

Harnessing technology for a lifetime of savings

Advancements in coil and fan technology mean the Kirby WRC Remote Condenser generates increased savings over the life of the unit.

Recognised for its technical excellence by AIRAH*, the Kirby WRC Remote Condenser is the most energy efficient unit of its type in Australia. The Kirby WRC has been designed with a larger coil to fan ratio than competitor models. This means the Kirby WRC needs less airflow to achieve the same capacity.

In fact, our WRC 6 fan model achieves the same heat rejection as a comparative 8 fan competitor model, giving you savings of up to 25%.

To find out how Kirby WRC Remote Condensers can save you money on your next project contact your Heatcraft Representative on **13 23 50**. To receive a Kirby WRC brochure and free 2012 Heatcraft diary†, simply email your request to info@heatcraft.com.au.

† Offer ends 31.12.11

*The Australian Institute of Refrigeration, Air Conditioning and Heating (AIRAH) is a specialist organisation for air conditioning, refrigeration, heating and ventilation professionals. For more information visit www.airah.org.au.
