## HEATCRAFT ENTERS THE CHILLER MARKET

New to Heatcraft is the Lennox Neosys™ Air-cooled liquid chiller. With capacities spanning 200-1000kW the Neosys™ range can be supplied with a wide range of options that make it suitable for most chilled liquid applications. The wide application range includes chilled water for comfort air conditioning and glycol chilling for process cooling in industries such as horticulture, winery and plastics injection moulding.

The Neosys™ range harnesses the latest global technologies including scroll compressors, micro channel condensers, variable speed fans / liquid pumps and R410A refrigerant for superior operating efficiency and reliability. With its smart aesthetics and low noise levels, Neosys is a discrete liquid chiller solution that has been designed with high performance, ease of service and installation in mind.

“This is a welcomed introduction to the Heatcraft range and strengthens our ability to satisfy a broader range of our customers’ needs” commented Heatcraft Channel Manager, Tony Queenin. “In this new era of carbon footprint awareness, the Neosys™ can be supplied with a range of features, including partial heat reclaim and eDrive™ variable water flow. These can vastly improve the system’s efficiency while the high efficiency microchannel heat exchanger delivers a 30% reduction in refrigerant charge with three times better corrosion resistance than traditional coils”.

Learn more about the Lennox Neosys chiller at the **2011 Heatcraft Smart Solutions Roadshow** or for more information contact Heatcraft Australia on **13 23 50**.

**Heatcraft Worldwide Refrigeration®** is a global leader in commercial refrigeration serving over 70 countries worldwide building its vision of being first choice in refrigeration. Setting the global benchmark in customer service, Heatcraft is at the forefront of sustainable technologies providing innovative refrigeration solutions that enhance the way we live.

Part of Heatcraft Worldwide Refrigeration, **Heatcraft** is a leading wholesale distribution business catering for the refrigeration and air conditioning trades with a distribution network of over 70 branch outlets across Australia and New Zealand.

**The Heatcraft vision is to be the market leader in temperature and climate control solutions.**
