NEW KIRBY® EVAPORATORS WITH EC FAN OPTION

The popular Kirby 9000 series of evaporators now includes an EC fan motor option to deliver significant energy savings.

EC fans are already a popular option within the Kirby Remote Condenser range and now with the demand for increased energy efficiency, Heatcraft has responded by including an EC option in the Kirby 9000 Series Evaporator range.

“The inclusion of the EC fan motor option provides a 55% power saving over the current AC motor range”, commented Colin Crowl, Senior Category Manager at Heatcraft Australia. “A second speed step provides an additional 45% saving for a total reduction of 75%”.

For projects seeking a reduction in carbon footprint, the inclusion of the EC motor can potentially save ½ tonne of carbon per annum.

The Kirby 9000 Series Evaporator range has been a successful inclusion in the Heatcraft range because of the unique fin pattern which minimises latent load and maximises sensible load. The enhanced fin configuration results in less moisture removal from the air and vastly improves run times before ice formation.

With face mounted defrost elements concentrating the heat where it is needed most the Kirby 9000 Series Evaporator uses less defrost heater wattage (up to 38% less than previous models) which helps to reduce energy consumption and can deliver substantial cost savings over the full life of the unit.

For more information on the Kirby 9000 Series Evaporator with EC motor, contact Heatcraft on **13 23 50** and speak to your local Heatcraft Account Manager.

Heatcraft Worldwide Refrigeration® is a global leader in commercial refrigeration serving over 70 countries worldwide building its vision of being first choice in refrigeration. Setting the global benchmark in customer service, Heatcraft is at the forefront of sustainable technologies providing innovative refrigeration solutions that enhance the way we live.

Part of Heatcraft Worldwide Refrigeration, **Heatcraft** is a leading wholesale distribution business catering for the refrigeration and air conditioning trades with a distribution network of over 70 branch outlets across Australia and New Zealand.

The Heatcraft vision is to be the market leader in temperature and climate control solutions.
